

1. Screenshot new writtten code
1. Method overloading

```
1 package hust.soict.dsai.aims.cart;
2
3 import hust.soict.dsai.aims.disc.DigitalVideoDisc;
4
5 public class Cart {
6     public static final int MAX_NUMBERS_ORDERED = 20;
7     private DigitalVideoDisc[] itemsOrdered = new DigitalVideoDisc[MAX_NUMBERS_ORDERED];
8     private int qtyOrdered = 0;
9
10    public void addDigitalVideoDisc(DigitalVideoDisc disc) {
11        if (qtyOrdered < MAX_NUMBERS_ORDERED) {
12            itemsOrdered[qtyOrdered++] = disc;
13            System.out.println("The disc has been added");
14        } else {
15            System.out.println("The cart is almost full");
16        }
17    }
18
19    public void addDigitalVideoDisc(DigitalVideoDisc dvd1, DigitalVideoDisc dvd2) {
20        if (qtyOrdered + 2 <= MAX_NUMBERS_ORDERED) {
21            itemsOrdered[qtyOrdered++] = dvd1;
22            itemsOrdered[qtyOrdered++] = dvd2;
23            System.out.println("The discs have been added");
24        } else {
25            System.out.println("The cart is almost full");
26        }
27    }
28
29    public void addDigitalVideoDisc(DigitalVideoDisc... dvds) {
30        for (DigitalVideoDisc dvd : dvds) {
31            if (qtyOrdered < MAX_NUMBERS_ORDERED) {
32                itemsOrdered[qtyOrdered++] = dvd;
33                System.out.println("The disc has been added");
34            } else {
35                System.out.println("The cart is almost full");
36            }
37        }
38    }
39 }
```

2. Passing Parameter

```
1 package hust.soict.dsai.test.disc;
2
3 import hust.soict.dsai.aims.disc.DigitalVideoDisc;
4
5 public class TestPassingParameter {
6     public static void main(String[] args) {
7         DigitalVideoDisc jungleDVD = new DigitalVideoDisc("Jungle");
8         DigitalVideoDisc cinderellaDVD = new DigitalVideoDisc("Cinderella");
9
10        DigitalVideoDisc[] dvds = {jungleDVD, cinderellaDVD};
11        swap(dvds);
12
13        jungleDVD = dvds[0];
14        cinderellaDVD = dvds[1];
15        System.out.println("jungle dvd title: " + dvds[0].getTitle());
16        System.out.println("cinderella dvd title: " + dvds[1].getTitle());
17
18        changeTitle(jungleDVD, cinderellaDVD.getTitle());
19        System.out.println("jungle dvd title: " + jungleDVD.getTitle());
20    }
21
22    public static void swap(DigitalVideoDisc[] dvds) {
23        DigitalVideoDisc tmp = dvds[0];
24        dvds[0] = dvds[1];
25        dvds[1] = tmp;
26    }
27
28
29    public static void changeTitle(DigitalVideoDisc dvd, String title) {
30        String oldTitle = dvd.getTitle();
31        dvd.setTitle(title);
32        dvd = new DigitalVideoDisc(oldTitle);
33    }
34 }
35 }
```

3. toString() method, searchById(), searchByTitle()

```
@Override
public String toString() {
    return "DVD - " + title + " - " + category + " - " + director + " - " + length + ": " + cost + " $";
}
```

```
public void searchById(int id) {
    boolean found = false;
    for (int i = 0; i < qtyOrdered; i++) {
        if (itemsOrdered[i].getId() == id) {
            System.out.println("Found: " + itemsOrdered[i].toString());
            found = true;
            break;
        }
    }
    if (!found) {
        System.out.println("No match found for ID: " + id);
    }
}
```

```
public void searchByTitle(String title) {
    boolean found = false;
    for (int i = 0; i < qtyOrdered; i++) {
        if (itemsOrdered[i].isMatch(title)) {
            System.out.println("Found: " + itemsOrdered[i].toString());
            found = true;
        }
    }
    if (!found) {
        System.out.println("No match found for title: " + title);
    }
}
```

4. printCart()

```

    public void print() {
        System.out.println("*****CART*****");
        System.out.println("Ordered Items:");
        for (int i = 0; i < qtyOrdered; i++) {
            System.out.println((i + 1) + ". " + itemsOrdered[i].toString());
        }
        System.out.println("Total cost: " + totalCost() + " $");
        System.out.println("*****");
    }

```

5. CartTest

```

        String tmp = o1.getTitle();
        o1.setTitle(o2.getTitle());
        o2.setTitle(tmp);
    }
}
```

The output shows the state of the objects and the result of the swap. The output is more detailed, showing the state of the objects and the result of the swap.

III. Updated use-case diagram and class diagram

IV. Answer the questions

- **Is JAVA a Pass by Value or a Pass by Reference programming language?**

- JAVA is a Pass by Value programming language.

When we pass a variable to a method, we pass the value of the variable, not the reference of the variable.

So, the original variable is not changed when we change the variable in the method.

- After the call of swap(jungleDVD, cinderellaDVD) why does the title of these two objects still remain?

- In the swap method, o1 and o2 are copies of the references to jungleDVD and cinderellaDVD.

Inside the swap method, you are just swapping the references (o1 and o2), but not the actual objects that these references point to.

After the call of changeTitle(jungleDVD, cinderellaDVD.getTitle()) why is the title of the JungleDVD changed?

- In the changeTitle method, you are copying the reference to jungleDVD.

However, this reference copy still points to the same jungleDVD object in memory.

When you call dvd.setTitle(title), you are modifying the state of the object that dvd points to, which is the same object as jungleDVD in the main method. Therefore, the title of jungleDVD is changed.
